

ELITE PRECISION WORKS

Specialized Fabrication Company Delivering
High Quality Stainless Steel Fabrication
Solutions for Food & Pharmaceutical Industries

An **ISO 9001:2015** Certified Company

www.eliteprecisionworks.in

At Elite Precision Works, we specialize in the manufacturing of high-quality fabrication assemblies for the food processing, pharmaceutical, and SPM sectors. With strong expertise in stainless steel fabrication, we deliver precision-engineered components that meet the highest standards of hygiene, durability, and performance. Equipped with advanced manufacturing capabilities and a skilled workforce, we ensure consistency, strict quality control, and full compliance with industry-specific requirements.

We place a strong emphasis on proper documentation and traceability, aligning with regulatory standards, especially for the food and pharmaceutical industries. We work closely with our clients to transform their designs into reliable and functional assemblies, ensuring timely delivery and uncompromised quality.

OUR MISSION

To deliver Precision Engineered and Compliance ready Fabrication Solutions

OUR VISION

To become a Trusted Fabrication partner for leading Pharma & Food companies

What We Serve

The products displayed are manufactured based on customer-provided designs. All intellectual property rights belong to the respective clients. These images are used solely to demonstrate our fabrication capabilities.

Mixing Vessel (Inside Mirror, Outside Matt Finish)

- Mixing Vessel with mirror finish inside for superior hygiene.
- Ensures smooth surface for easy cleaning and maintenance.
- Prevents material sticking and improves product flow.
- Matte finish outside offers durability with a sleek appearance.

Paste Preparation Vessel

- Ensures smooth blending of ingredients for consistent quality.
- Hygienic construction suitable for food and pharma applications.
- Equipped for easy cleaning and maintenance.
- Built for reliable and long-term performance.

Silo

- Ensures protection from moisture and external contamination.
- Constructed with high-quality materials for durability.
- Provides easy loading and controlled discharge system.
- Ideal for long-term and reliable storage applications.

Machine Columns

- Ensures precise alignment during operation.
- Manufactured with high-quality materials for durability.
- Resistant to vibration and heavy load conditions.
- Thickness of column-5-12mm and length-upto-8-meters.
- Straightness-Within 1 to 1.5mm throughout the length.

Structure with machining

- Precision machining after fabrication.
- Built with high-quality materials for strength and durability.
- Minimizes vibration and enhances operational efficiency.
- Flatness of base within 0.1mm
- Perpendicularity within 0.1mm

Machined Structure with cladding

- Precision-machined structure ensuring high accuracy and durability
- Cladding provides enhanced protection against corrosion and wear
- Uniform Vibro polished for better Appearance
- Aesthetically superior

Stainless Steel Platforms & Structures

- Provides safe and stable working platforms for industrial operations.
- Made from high-quality stainless steel for corrosion resistance.
- Ensures long-lasting performance in demanding environments.
- Ideal for pharmaceutical, food, and chemical industries.

Skid Structure

- Ensures compact, modular, and easy-to-install system integration.
- Built with high-quality materials for durability and cleanliness.
- Supports efficient equipment mounting and operation.
- Ideal for pharmaceutical and sterile production applications.

Trolley

- Ensures easy transportation of goods within industrial facilities.
- Built with high-quality materials for strength and durability.
- Equipped with stable wheels for safe movement.
- Provides high load-bearing capacity with stable construction.

Arm Assemblies for Holding Silos

- Fabricated with high-quality materials for durability and strength.
- Resistant to vibration and heavy operational stresses.
- Ensures secure positioning and balanced load distribution.
- Ideal for reliable industrial silo applications.

WIP Trolleys

- Optimized for smooth material flow between production stages.
- Constructed with robust and corrosion-resistant materials.
- Ideal for manufacturing, pharma, and assembly units.
- Provides easy handling and stable transportation.

Sheet Metal Assemblies

- Fabricated with high-quality materials for durability and reliability.
- Ensures accurate fitment and excellent dimensional stability.
- Suitable for a wide range of industrial requirements.
- Built for long-lasting performance in demanding environments.

Ducting

- Ensures smooth transfer of air, gases, or materials.
- Fabricated with high-quality materials for durability and strength.
- Minimizes leakage and improves system efficiency.
- Ideal for industrial and cleanroom applications.

Pressure Parts

- High-quality stainless steel industrial components.
- Strong, durable, and corrosion-resistant design.
- Precision engineering for reliable performance.
- Perfect for heavy-duty industrial use.

Skirt for Tanks

- Ensures stable load distribution and safe tank installation.
- Manufactured with high-quality materials for durability.
- Resistant to corrosion and heavy operational conditions.
- Ideal for industrial storage and processing tanks.

Machine Drum Flanges

- Ensures smooth transfer of air, gases, or materials.
- Fabricated with high-quality materials for durability and strength.
- Minimizes leakage and improves system efficiency.
- Ideal for industrial and cleanroom applications.

Quality Policy Statement

- We strictly adhere to the ISO 9001:2015 Quality Management System.
- We understand the hygiene and safety requirements of the food and pharmaceutical industries and operate accordingly.
- We ensure complete process control through well-documented Standard Operating Procedures (SOPs).
- We maintain full material traceability and authenticity verification at every stage.
- We focus on continuous improvement and customer satisfaction.
- All parts are manufactured as per approved QAP by customers/TPI and follow SOPs for all critical activities.

Infrastructure & Strength

- Workshop Area: 7000 Square Feet covered shed
- Dedicated SS & MS Fabrication Zones
- TIG Welding Machines-8 no's
- Polishing Machines-8 Nos
- Machined Base Plate for Fitting
- Fabrication Tools and Equipment
- Cutting & Grinding Setup
- Skilled Qualified Welders-3 Nos

Why Choose Elite Precision Works?

- SOP-Based Controlled Processes
- Hygienic fabrication focus
- TPI Qualified Welders
- 100% Material Traceability
- Complete Compliance Documentation
- Reliable Delivery & Competitive Pricing

Our Esteemed Clients
